

AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

Please amend paragraph 0004 as follows:

--As such, Internet users searching for products, services, or information typically use a keyword based Internet search engine, such as ~~Yahoo!, Google, Excite,~~ YAHOO!, GOOGLE, EXCITE, and the like to find Internet sites and pages. The user starts their search by entering a search query containing at least one expected keyword inside the search engine input box, which the search engine then uses to search its database and generate a return list of relevant Internet sites and pages.—
